GLOBAL FORCE MANAGEMENT

Program of study with emphasis on JCRM and the GFM process

email

Phone

Register

Schedule

JDTC Wikis

The Global Force Management (GFM) program of study at the Joint Deployment Training Center (JDTC) provides joint planners with a firm understanding of the assignment, allocation, and apportionment processes; and the functionality of the tools, guidance and procedures that support the National Defense Strategy.

The Joint Capabilities Requirements Manager (JCRM) is a web-based GFM tool that increases the efficiency of the GFM process by providing senior DoD decision makers with a consolidated database of joint forces, capabilities, and requirements.

Global Force Management Courses and Briefs

- [GFM Overview](#)
- [JCRM Course](#)
- [JCRM Functional Manager Course](#)
- [JCRM Requirements Training](#)
- [JCRM Force Provider Training](#)
- [JCRM Requirements and Force Provider Reference Tool](#)

INSTRUCTION VENUE OPTIONS

- Resident Training (RT) – Hands-on instruction at JDTC's Fort Eustis, VA facilities
- Mobile Training Team (MTT) – Customer Requested Instruction/Support at or near the student/organization's
- Virtual Campus (VC) – Self-paced or instructor-led online instruction via JDTC's Learning Management System or Defense Connect Online (DCO)

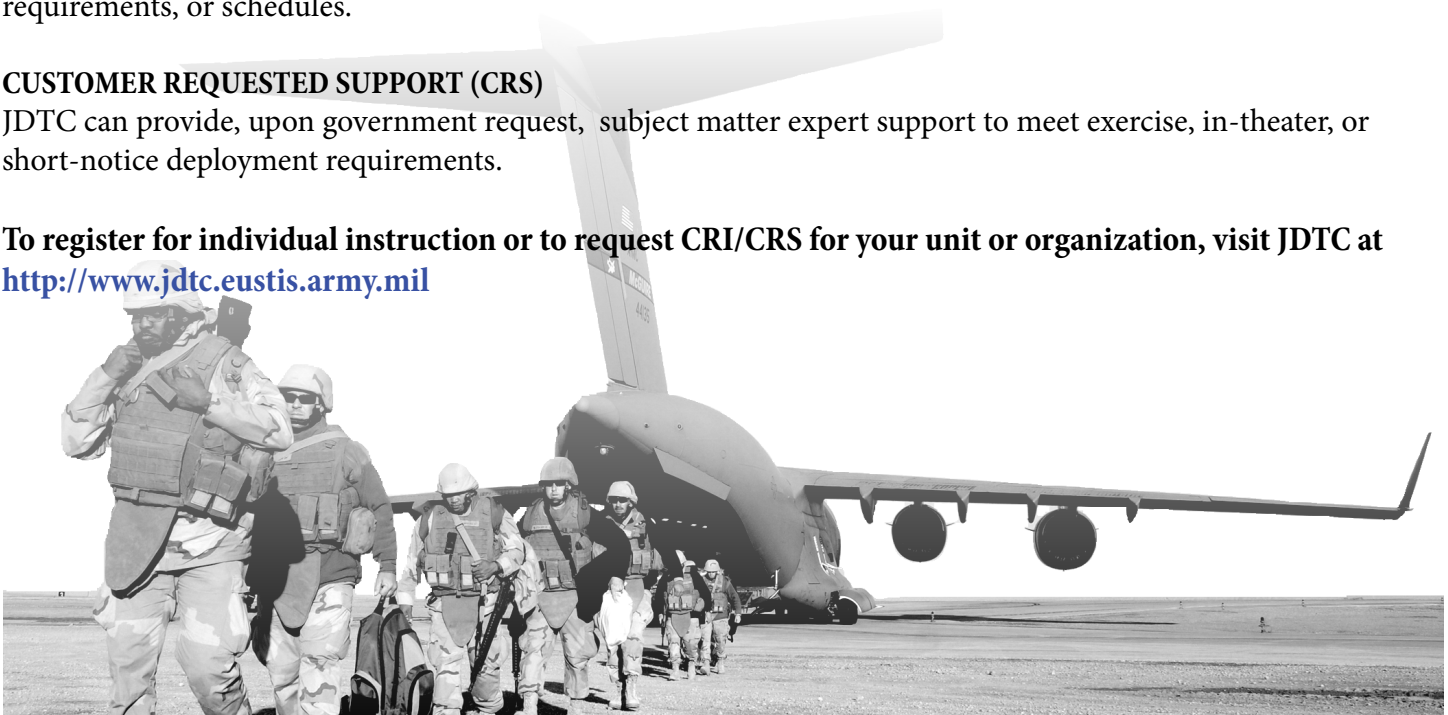

CUSTOMER REQUESTED INSTRUCTION (CRI)

JDTC can provide, upon government request, tailored instruction, customized to specific training needs, requirements, or schedules.

CUSTOMER REQUESTED SUPPORT (CRS)

JDTC can provide, upon government request, subject matter expert support to meet exercise, in-theater, or short-notice deployment requirements.

To register for individual instruction or to request CRI/CRS for your unit or organization, visit JDTC at <http://www.jdtc.eustis.army.mil>

Global Force Management (GFM) Overview

GF1101

email

Phone

Register

Schedule

JDTC Wikis

Objective

GFM Overview provides joint force personnel with an understanding of the GFM processes and their relation to the Joint Capabilities Requirements Manager (JCRM).

Prerequisites

Final U.S. Secret security clearance

Recommended Participants

Global Force Managers (GFM) and members of the Joint Planning & Execution Community (JPEC)

Major Topics

- History – Provides the background information that led to the creation of GFM by the Secretary of Defense
- Purpose – Provides the goal and Objectives behind the GFM process
- Benefits – Shows how GFM, when used in accordance with proper procedure, can expedite the task of meeting worldwide strategic goals
- Tools – Lists the tools currently used for GFM and provides a brief description of each
- Importance – Identifies the need for GFM given today's operational environment and why GFM is essential to provide planners with near real time view of force availability

Length

1-4hrs

Tools & Applications

SIPRNET web browser

Venue Options

- Resident Training (RT) – Hands-on instruction at JDTC's Fort Eustis, VA facilities
- Mobile Training Team (MTT) – Customer Requested Instruction/Support at or near the student's location

Schedule

JDTC Wikis

Objective

JCRM provides joint force personnel with a basic understanding of the functionality and navigation of the JCRM application and its modules

Prerequisites

- GF1101 – Global Force Management Overview on JDTC Virtual Campus via SIPRNET
- Final U.S. Secret security clearance

Recommended Participants

Global Force Managers (GFM) and members of the Joint Planning & Execution Community (JPEC)

Major Topics

- The Capabilities Module - Provides all users the ability to build capability packages for plug-and-play planning during contingency or crisis action planning
- The Requirements Module - Provides Combatant Command users the ability to manage the 5 types of requirements for CJCS and SECDEF approval
- The Force Provider Module - Provides the ability to work sourcing solutions in a collaborative environment for CJCS and SECDEF approval
- The Force Deployment Module - Provides the planning community with the ability to compare the planning database with the JOPES database to determine if planned forces align with actual forces deployed to fill a requirement

Length

1-3 Days

Schedule

JDTC Wikis

Objective

JCRM FM provides joint force personnel with the knowledge and skills that will allow them to support and effectively manage Joint Capabilities Requirements Manager (JCRM) accounts and reference files.

Prerequisites

- Recommendation by Combatant Command JCRM Functional Manager (JCRM-FM)
- Final U.S. Secret security clearance

Recommended Participants

Essential for military of civilian personnel who perform JCRM Functional Management duties have a need-to-know requirement and the ability to access FM specific applications and information

Major Topics

- JCRM Permissions – Provides the major roles and utility roles, identifies functional permissions and demonstrates the request process for JCRM applications
- Creating Accounts – Provides the process for creating user accounts, user groups, and also demonstrates user administrative functions
- Managing Accounts – Provides the process for managing user accounts and user groups
- Manage Reference Files – Provides the process for managing JCRM reference files, and how to use JCRM to interface with JOPES

Length

2 Days

Tools & Applications

- Joint Capabilities Requirements Manager (JCRM)

Venue Options

- Resident Training (RT) – Hands-on instruction at JDTC's Fort Eustis, VA facilities

JCRM Requirements Training (JCRM RT)

GF1201

email

Phone

Register

Schedule

JDTC Wikis

Objective

JCRM RT provides joint force personnel with supplemental knowledge and refresher skill-sets taken from the (GF1102 JCRM) course to fulfill Global Force Management Requirements duties.

Prerequisites

Final U.S. Secret security clearance

Recommended Participants

Global Force Managers and members of the Joint Planning & Execution Community (JPEC)

Major Topics

- Unit Type Code (UTC) – Provides the Global Force Management (GFM) Planner with the characteristics of a UTC, breaks down the five-character number, shows how the UTC data is developed and the differences between standard and non-standard UTCs
- Force Tracking Number (FTN) – Provides a complete breakdown of the eleven character FTN including who assigns it, when it will be assigned, and also the significance of each character position
- Emergent Requirements – Provides the GFM Planner an opportunity to create an emergent requirement with both a standard, and non-standard UTC. It describes the differences between the two and also provides a printable step by step guide for completing each type of emergent requirement
- Association Management tool – Provides the GFM Planner with a tool to logically group records in the JCRM database to facilitate organization and monitoring and provides a printable step guide for creating an Association
- Mass Edit Function – Provides the GFM Planner with a complete description of the Mass Edit function and how it can be used to simplify your role as a Planner. A printable step guide is also available for how to use this function and can be saved for future reference
- Request for Forces (RFF) – Provides the Planner with the justification for when a RFF will be required, who generates it, and what it will provide

Register

Schedule

JDTC Wikis

Objective

JCRM FP Training provides joint force personnel with supplemental knowledge and refresher skill-sets taken from the (GF1102 JCRM) course to fulfill Global Force Management Force Provider duties.

Prerequisites

Final U.S. Secret security clearance

Recommended Participants

Global Force Managers (GFM) and members of the Joint Planning & Execution Community (JPEC)

Major Topics

- Purpose of Force Provider (FP) module – Provides a complete description of the FP module and how its proper application will assist the Planner
- Account Access – Provides account access options available to the Functional Manager for granting accounts and how a role an individual will fill affects his/her access levels
- Menu bar - Menu bar describes the function and use of the various tabs and sections of the menu bar
- Filters – Provides the theory behind the benefits and usage of the filter function and then provides a step guide to creating a filter
- Flow of requirements – Describes the path of requirements from initial request through approval decision and Deployment order generation
- Responsibilities – Describes the responsibilities of the four Joint Force Providers and provides a step guide for creating force requests
- Orders – Provides the requirements necessary prior to the creation of orders, and how the time frame impacts what schedule the order will be placed on
- Changes – Provides the use and purpose of the change function and the use of the four submenus with a step guide to see how to utilize the FP CHANGES option
